## **Deep Linking in ULearn**

Deep linking allows a learner to click a URL (or link) that goes directly to a particular page in ULearn as opposed to the main sign-in page. It eliminates the need to search for training items in ULearn by sending learners to a specific place in the system, such as a course registration page. Deep links can be used in emails as well as on departmental websites.

1. Navigate to Admin > Catalog and click < Deep Link >.

2. On the Deep Link page, click the Deep Link Generator tab.

| Base URL | Page URL | Deep Link Generator |
|----------|----------|---------------------|
| ADD NEW  |          |                     |

3. Select the type of link to generate. For a user registration link, select "LO Details."

| Page URL   | Image Alternate Text  | Link Expiration Date           |
|--|---|--------------------------------|
| Select<br>Browse for Training<br>Calendar<br>Competence Assessment Summary<br>Custom Reports<br>Dashboards<br>Goals List | No Image V  | Generate Link                  |
| Knowledge Bank<br>Launch Training<br>LO Details<br>Performance Reviews<br>Scheduled Tasks                                | DnDemand, Inc.® 2000-2011 Cornerstone OnDems<br>9   Privacy Statement | and, Inc. All Rights Reserved. |

4. Click the pop-up icon to search for the training for which the link is being created.

| Base URL   | Page URL | Deep Link Generator |                     |                |                      |                |

|          |                 | 15021565010C title= Alternate Text - Alternate Text - A  |                                  |                         |                              |   |

8. Not using HTML? Copy the registration link beginning with "https" and ending before "title=". Do not include quotes. Be sure the *<a href=* and *' title='Alternate Text'>Alternate Text</a>* are not part of the link–those portions are only for HTML.
